"Crystallization and preliminary crystallographic study of the
peptidoglycan-associated lipoprotein from Escherichia coli.";
Acta Crystallogr. D 57:317-319(2001).

-i- FUNCTION: Thought to play a role in bacterial envelope integrity.

Very strongly associated with the peptidoglycan.

-i- SUBCELLULAR LOCATION: Attached to the outer membrane by a lipid
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  SEQUENCE

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         FUNCTION: HAS PORIN ACTIVITY, FORMING SMALL WATER-FILLED CHANNELS.
ALSO HAS A STRUCTURAL ROLE IN DETERMINING CELL SHAPE AND ABILITY
TO GROW IN LOW-OSMOLARITY MEDIUM.
SUBCELLULAR LOCATION: Integral membrane protein. Outer membrane.
FYM: TWO DISULFIDE BONDS ARE PRESENT.
SIMILARITY: BELONGS TO THE OMPA FAMILY. STRONG, TO OTHER
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                PSEUDOMONAS SPECIES OPRF.

Outer membrane MISCELLANEOUS: PIII IS CLOSELY ASSOCIATED WITH PART, BUT NOT AL OF THE PI MOLECULES IN THE GONOCOCCAL OUTER MEMBRANE.

MISCELLANEOUS: A PORTION OF THE PIII IS EXPOSED TO THE SURFACE INTACT GONOCOCCI; THE PROTEIN CAN BE LABELED WITH IODINE AND REACTS WITH MABS.

SIMILARITY: BELONGS TO THE OMPA FAMILY. STRONG, TO N.MENINGITID
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         A27894; A27894.
